Team

Our Shared Philosophy:

"Giving back is not just a feature of our application—it is the foundational belief that guides how we design and build."

Frescylia Frida

Technical Architect & Social Impact Engineer

- **Academic Excellence:** Holds a **Master of Business in IT** and currently pursuing a **Master's in Software Engineering from the National University of Singapore (NUS)**. Hands-on experience in application development, system design and data-driven solutions.
- **10+ Years** as a volunteer
- **Cross-Border Expertise:** Born in Indonesia and based in Singapore, she understands community needs across different cultural contexts.
- **Technical Focus:** Translates real community and humanitarian needs into practical, secure and scalable digital solutions.

Lim Wei Jie

Marketing & Creative Lead

- Works at the **National University of Singapore (NUS)**, supporting strategic fundraising, major donor relations and philanthropic stewardship.
- **10+ Years** as a volunteer
- **8+ Years** in donor relations, fundraising strategy and philanthropic stewardship.
- **Proven Digital Track Record:** Participated in the planning and UAT of a major donor management platform migration to Microsoft 365 for a non-profit organisation (2017-2019).

Problem - The Great Disconnect

Useful items exist, but donors lack verified, real-time visibility into what communities actually need and where.

URBAN
SURPLUS

RURAL &
COMMUNITY NEEDS

Solution – The Digital Bridge

Two-Way Listing Visibility:

- Verified, real-time listings

Location-Based Priority Assessment:

- Highlights urgent needs by location, helping donors see where support is needed most.

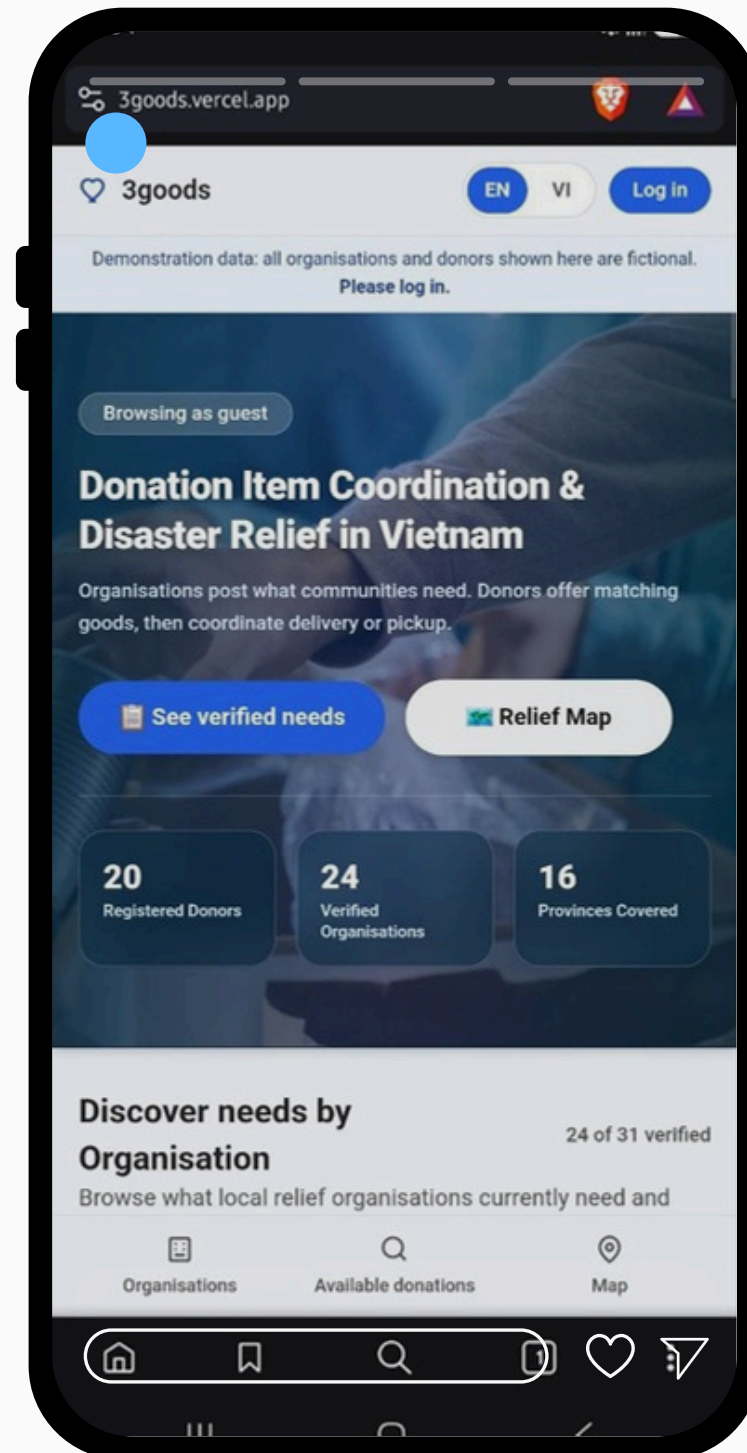

Pre-Acceptance In-App Chat:

- Lets donors and receiving organisations confirm suitability before arranging collection or delivery.

Product Overview

Core Mission

3goods improves charitable giving by replacing uncoordinated donations with a demand-led coordination platform designed for Vietnam's digital and community infrastructure.

Demand-First Supply Chain

Rather than sending unrequested surplus items to receiving centres, the platform uses a two-sided listing system for available donations and verified needs.

Human Layer: Verifying Which Items are Needed

- **Ground-Level Need Validation:** Charities assess local needs and publish specific, itemised requests.
- **Pre-Acceptance Review:** Charity coordinators use in-app chat to verify item suitability before collection.

Hybrid Digital + Human Trust Architecture (Planned Enhancement)

Proposed VNeID Identity Verification: Future integration could strengthen identity checks, protect user data and reduce fraudulent listings.

Proposed journey:

Requested -> Chat -> Verified -> Collected.

Delivering Measurable Social Impact

Clearer Demand Visibility:

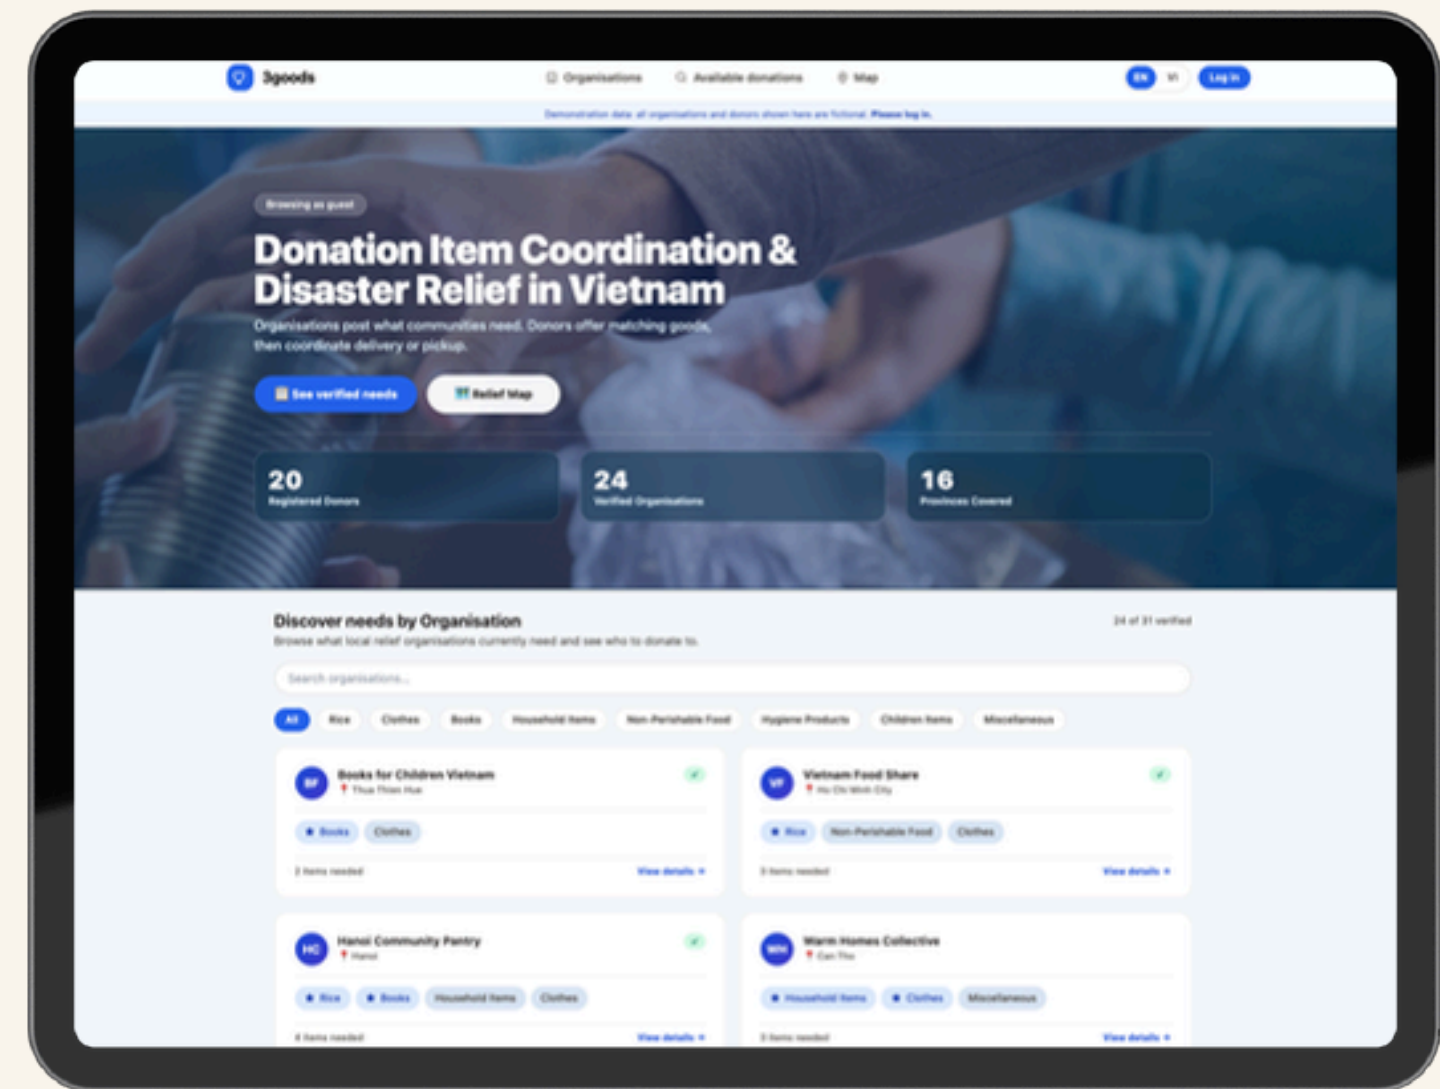

Donors can prioritise items that match active, verified community needs.

Reduced Inventory Overload:

Pre-acceptance chat helps charities receive items that are useful and currently needed.

Stronger Transparency:

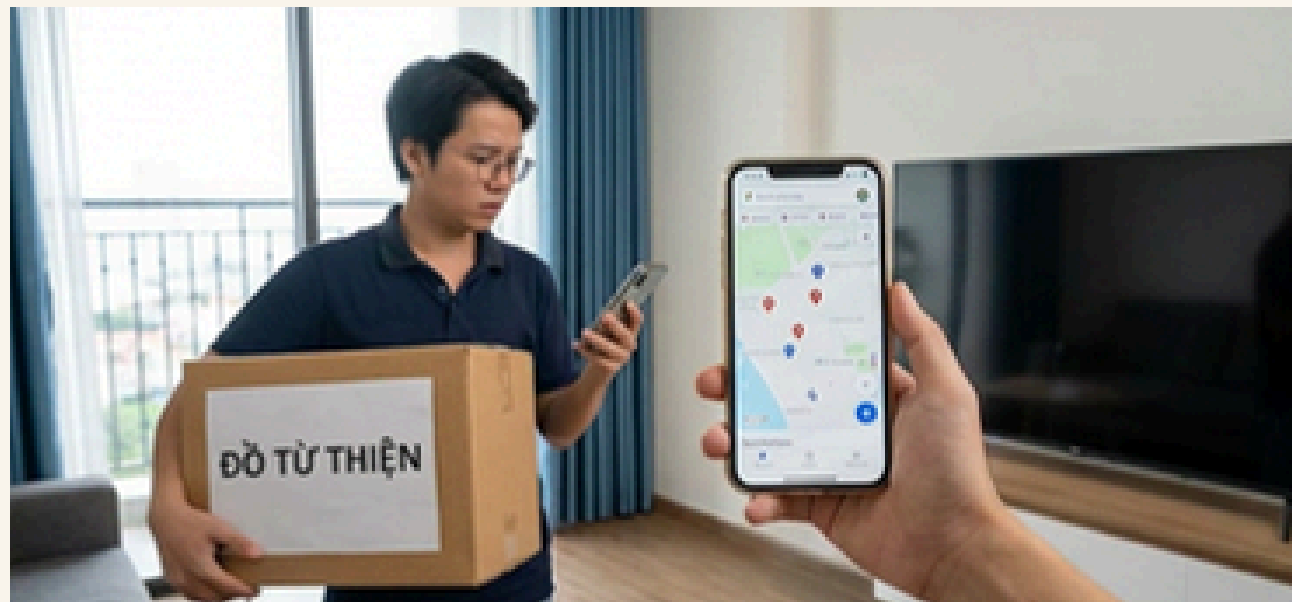

Planned VNeID verification, QR-code handovers and delivery receipts could strengthen accountability and public trust.

Target Audience

The Donors (Givers)

- **Urban Households & Individuals:** People with surplus items (clothes, books, household goods) from decluttering.
- **Tech-Savvy Youth & Professionals:** Mobile-first users seeking convenient, transparent ways to give back.

The Charity Administrators (Receivers & Coordinators)

- **Local NGOs, Shelters & Community Groups:** Organizations directly serving vulnerable populations (elderly, children, low-income families).
- **Local Authorities & Community Representatives:** Ward officials and community leaders coordinating local aid, especially during disasters.
- **Schools & Hospitals:** Institutions requiring specific supplies for students or patients.

Market Opportunity

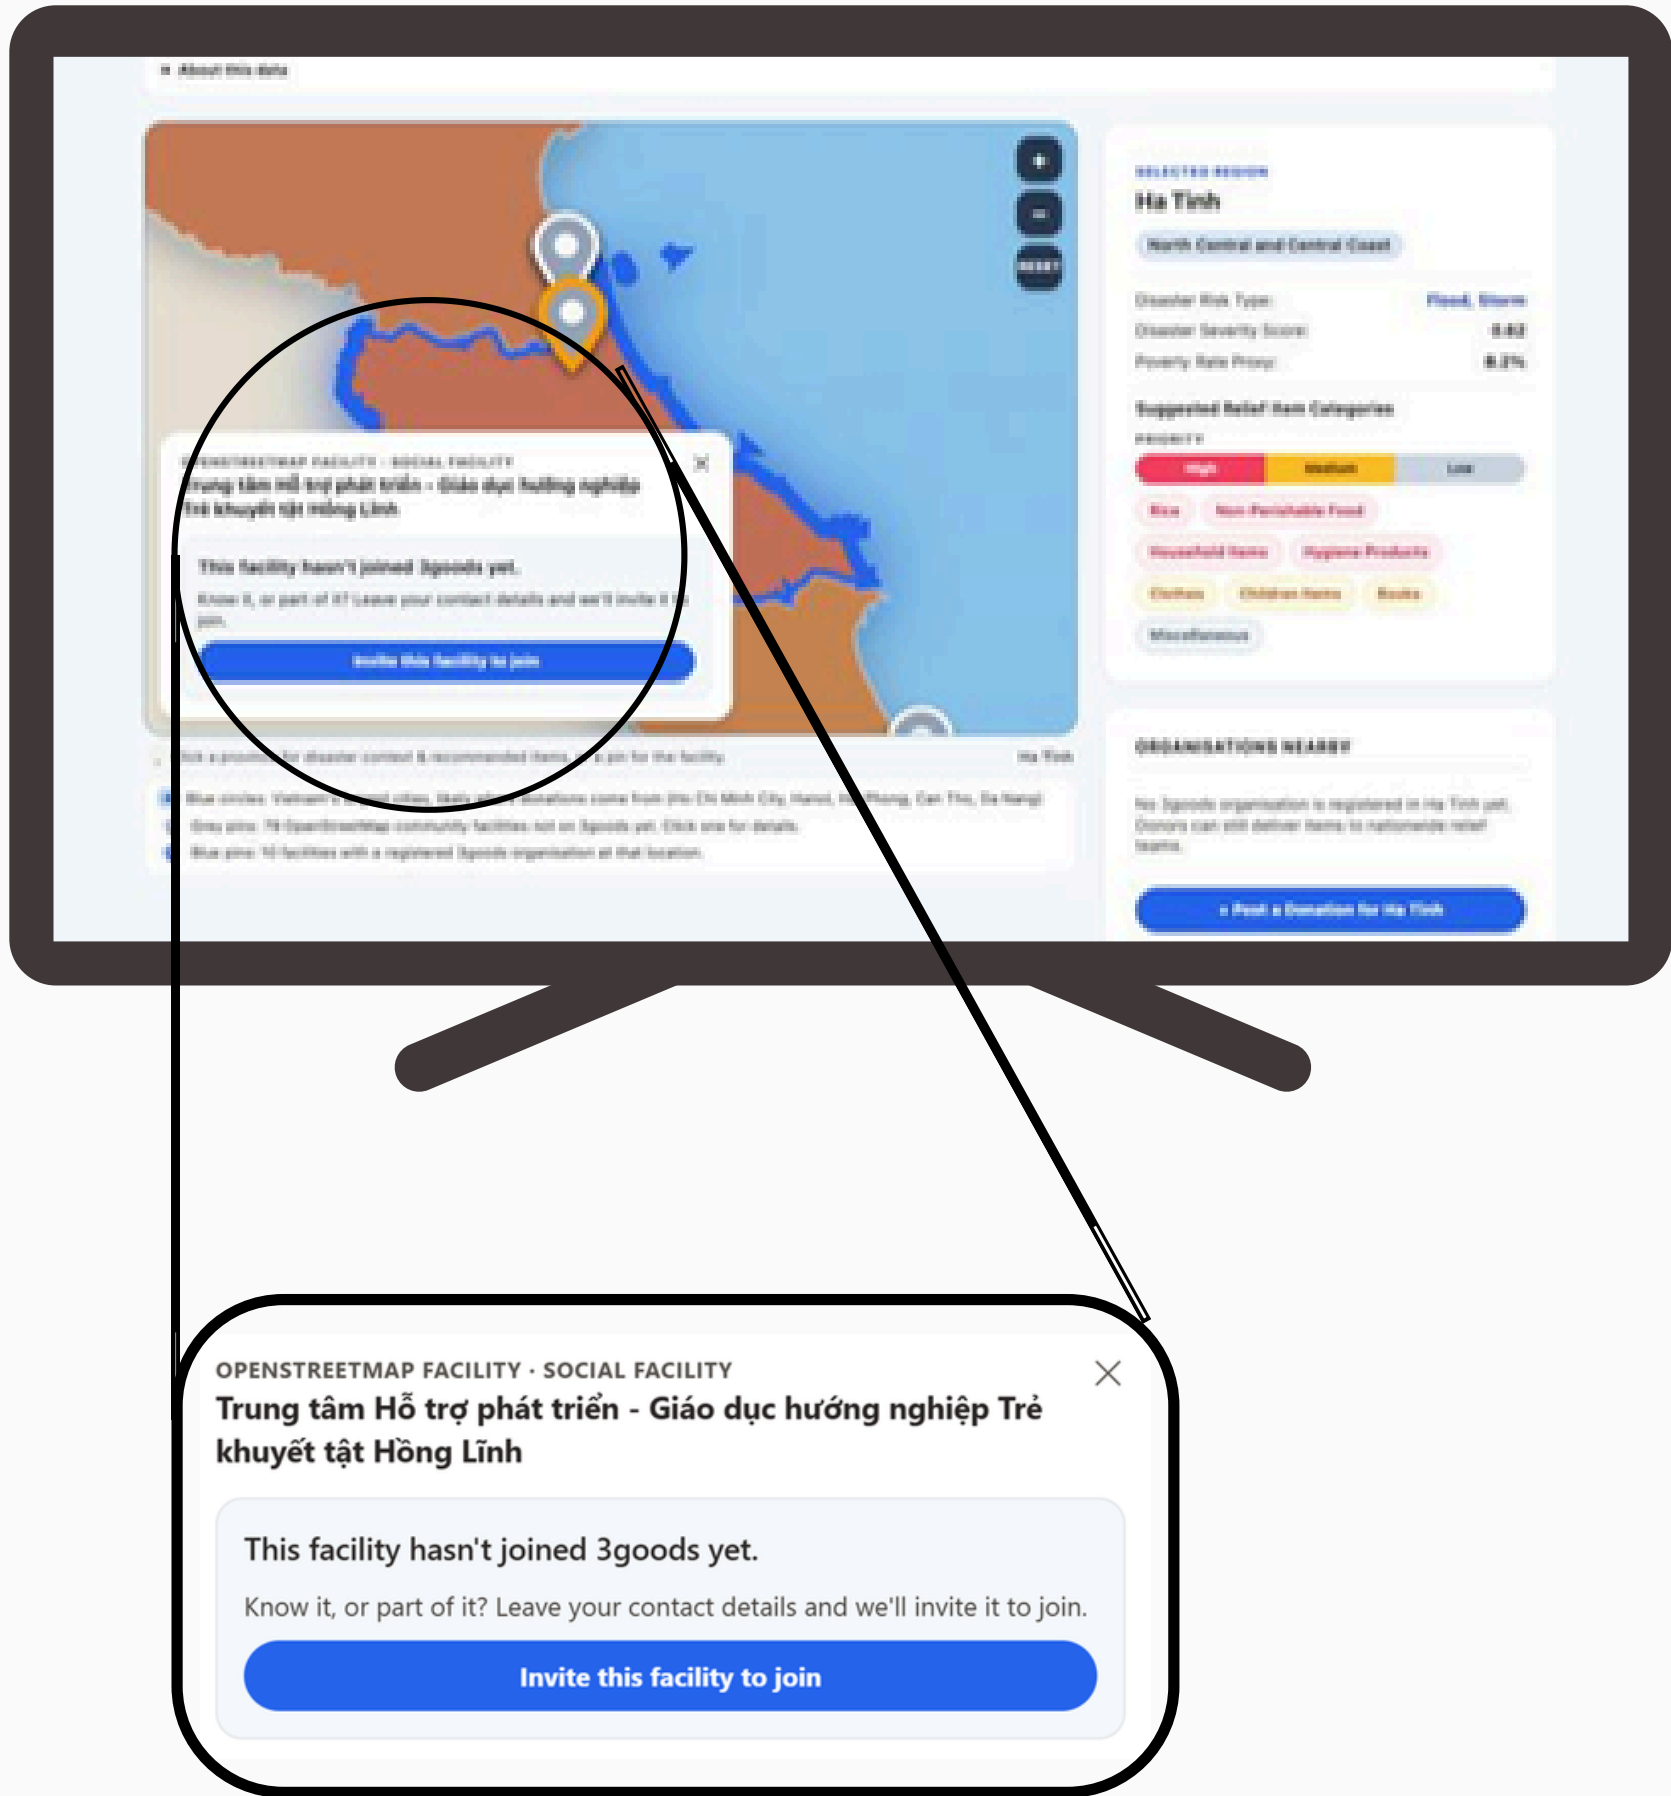

Live Feature: "Invite Your Favorite Charity"

Enable donors to invite trusted local or grassroots charities to join the platform.

Potential Enhancements (3goods version 2.0)

Feature: "Proxy Request" / "Help a Neighbor"

Enable digitally confident citizens to submit assistance requests on behalf of neighbours, older residents or rural families who may need help using the platform.

Marketing Strategy

Strategic Pillar	Cultural Anchor & Messaging	Target Channels & Tactics	Key Execution / Campaign	Success Metrics (KPIs)
1. Trust & Government Endorsement	Give with Certainty Overcomes donor skepticism by anchoring in national digital identity and official oversight.	• VNeID Platform • Vietnam Fatherland Front (Mặt Trận Tổ Quốc) • Local Ward Offices (Ủy Ban Nhân Dân)	Pilot VNeID verification badges to strengthen trust and reduce fraudulent accounts.	Target: 70% of registered users identity-verified within 6 months of integration.
2. Grassroots & Rural Community Access	Bridging Every Ward & Village Enables inclusive giving for elderly and remote residents via trusted local networks.	• Youth Union (Đoàn Thanh Niên) • Local Ward Leaders (Trưởng Dân Phố)	Train Youth Union volunteers to run community roadshows and help residents use the app.	Target: 35% of fulfilled aid requests originating from rural or remote communities.
3. Digital & Social Media Engagement	"Declutter for Good" (Dọn Nhà Sẻ Chia) Appeals to urban households and tech-savvy youth seeking fast, visible impact.	• TikTok & Short-Form Video • Micro-KOLs & Educators • In-App Live Matching Map	Showcase consent-based donation handovers through short-form videos.	Pilot target: match urgent needs within 24 hours and general items within 48 hours.

Conclusion

A Name Rooted in Timeless Values

The name 3goods is inspired by a simple yet profound human philosophy: The Three Good Acts.

True community transformation begins at the personal level. When everyday individuals align their thoughts, words, and actions toward the upliftment of others, systemic change naturally follows.

Brand Vision:

"3goods is more than a technology application; it is a daily practice. By bringing the Three Good Acts into modern digital infrastructure, 3goods aims to turn good intentions into measurable, real-world impact across Vietnam."
